

Unit:
The Stone Age

Concept:

Subject:
Geography

Where did Stone Age people settle?

The earliest evidence of humans were found in Africa. From Africa, humans travelled across the world, heading into Asia and Europe and later, into Australasia and the Americas. Why might it have taken longer to get to Australasia and the Americas?

Evidence still exists today of Stone Age civilizations. Skara Brae and Stonehenge are two iconic Stone Age ruins found in the UK.

What?
